super lichte maar zeer complete laptop

Ik heb de Galaxy Book2 Pro gekocht omdat ik ben gestart met een opleiding en hiervoor een laptop nodig had. Nu kan hij echt stukken meer dan dan de eisen vanuit mijn opleiding waren, dus dat was al een bonus. Maar het belangrijkste voor mij was dat deze laptop echt superlicht is en ik hem dus makkelijk overal mee naar toe kan nemen. Ook is de batterijduur lekker lang. Hij koppelt snel en goed met mijn andere Samsung producten wat heel handig is: ik kan vanuit mijn telefoon makkelijk en snel overschakelen naar de laptop en andersom. Sowieso reageert de laptop erg snel. Het scherm is tot nu toe helemaal prima gebleken, ik heb alleen nog niet mee buiten of in hele zonnige/lichte ruimtes gewerkt, dus ik kan daar nog niets over melden. Het toetsenbord typt licht en omdat deze verlicht is, kan ik ook s'avonds nog even lekker door. Een kleinigheidje is dat er maar weinig usb poorten opzitten, maar dat ik makkelijk opgelost door een usb hub bij aan te schaffen of met een draadloze muis (bluetooth) te werken. Het feit dat er wel een hdmi aansluiting en card reader opzitten, was voor mij belangrijker dan de extra usb poorten. En dan is het ook nog eens een heel mooi ding om te zien. Niet perse een eerste vereiste, maar wel een hele fijne bijkomstigheid.

Fantástico pero con un problema de rendimiento

fbanos

El portátil tiene unas características espectaculares: gran pantalla OLED con colores brillantes, peso pluma a la hora de transportarlo y gran potencia de procesador y disco duro. Por contra, tiene un problema de diseño: al arrancar desde apagado no se activa nunca el TurboBoost, afectando negativamente a su rendimiento (se puede sortear este inconveniente desactivando en Windows el Inicio Rápido). Esperemos que Samsung se ponga las pilas y corrijan este problema (¿actualización de la Bios?). Por lo demás, estupendo en todo.
